Introduction

Introduction

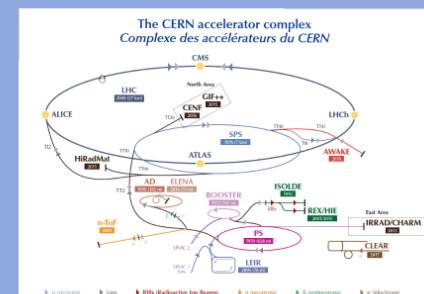

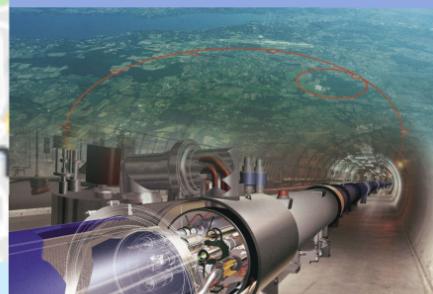

CERN : European Laboratory for Particle Physics

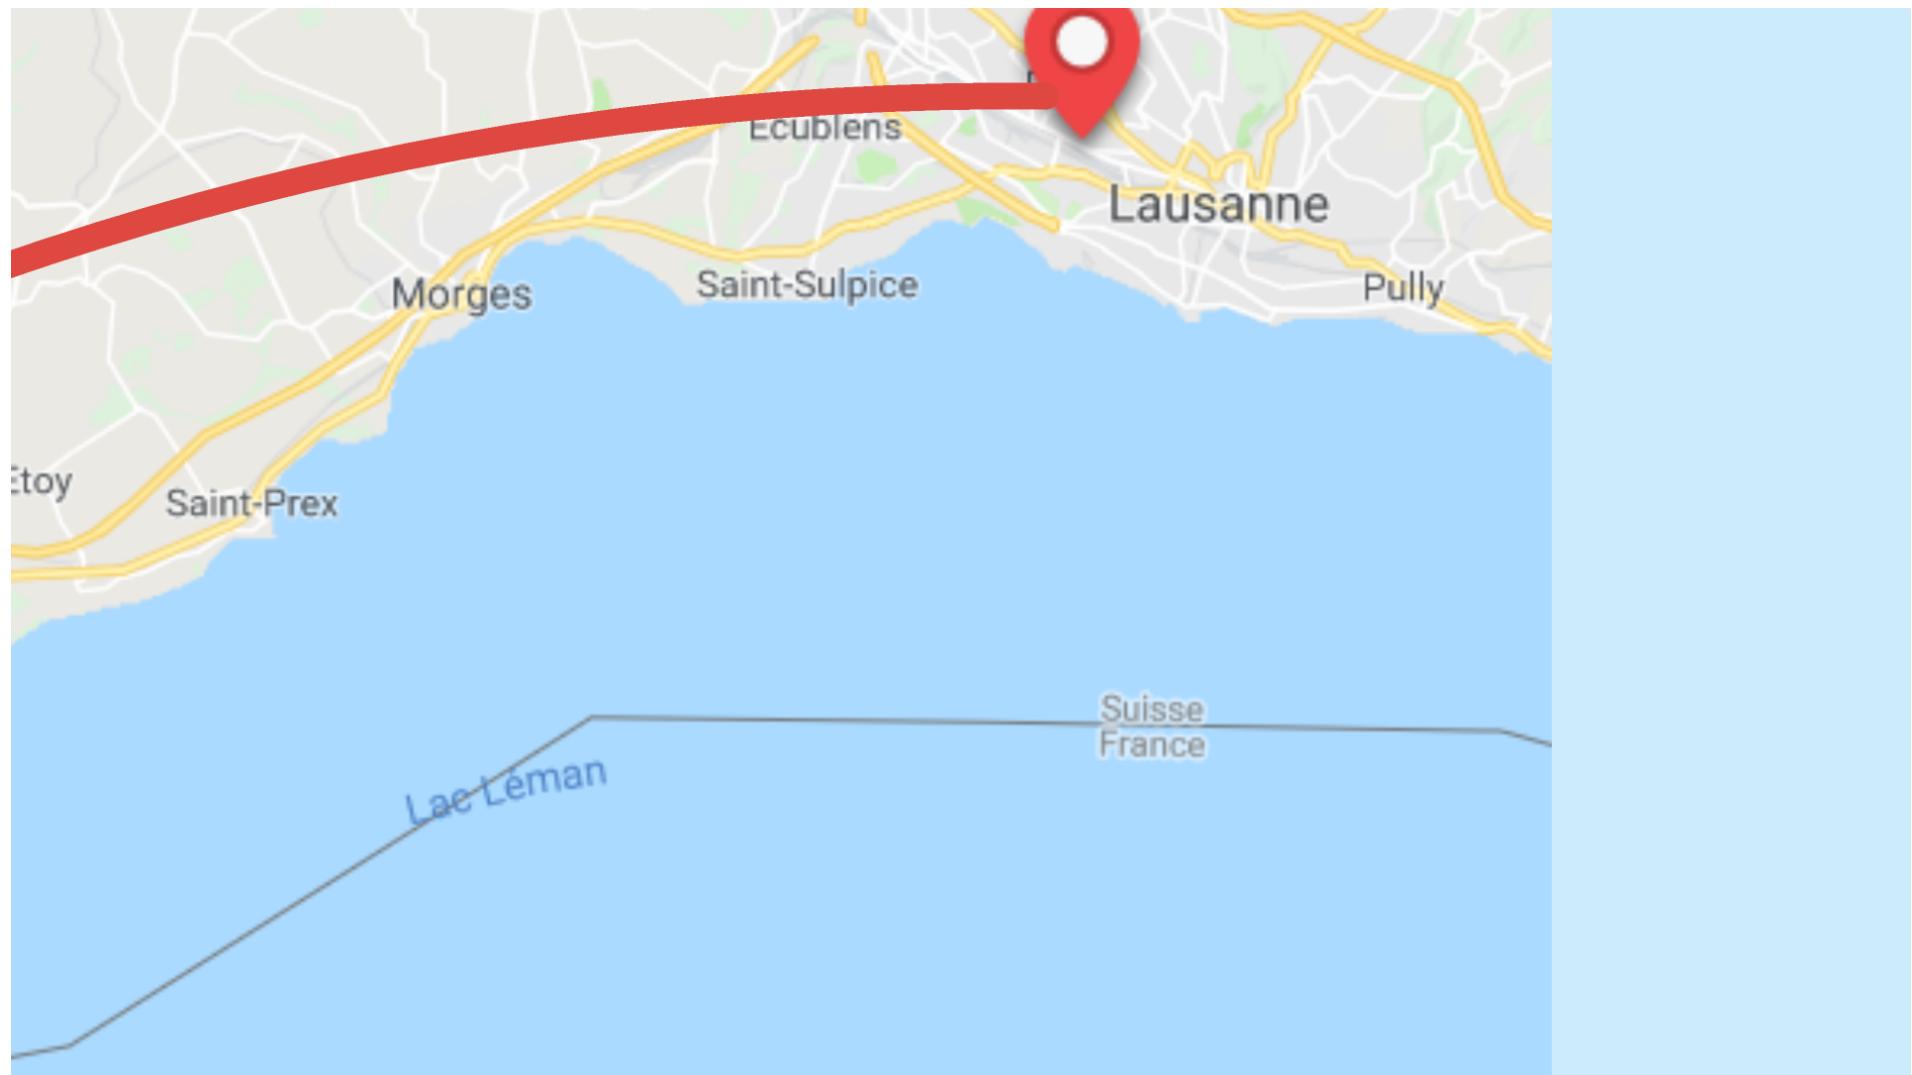

Mission : provide, perform, unite

Goals : Discovery, Innovation, Diversity, Inspiration and Education

- 15 000 Persons, all over the world
- 2 host states
- 2 official languages : EN, FR

Radiation Protection Group : 68 Staff Members

A map of the Lausanne area showing the location of the Institute for Radiation Physics (IRA) at Ecublens. A red pin marks the site, which is located between Ecublens and Lausanne. The map also shows the Lake Geneva, Saint-Sulpice, and other surrounding areas.

**IRA : Institute for RAdiation Physics
Lausanne University Hospital**

Mission: R&D programs: Ionizing radiation for medical application and RP

Radiation Protection Group : 18 Staff Members

- Dosimetry service (9500 customers)
- Radon measurements
- RP consulting
- Emergency intervention
- Research projects
- RP Training

Introduction

Common Projects

Common Projects

Collaboration

Common Projects

Collaboration

- External and internal dosimetry
- Activated material
- Detector development
- Consultancy

Common Projects

Collaboration

- External and internal dosimetry
- Activated material
- Detector development
- Consultancy

Common Projects

- External and internal dosimetry
- Activated material
- Detector development
- Consultancy

Common Projects

Collaboration

- External and internal dosimetry
- Activated material
- Detector development
- Consultancy
- **Trainings**

Common Projects

Collaboration

- External and internal dosimetry
- Activated material
- Detector development
- Consultancy
- **Trainings**

RP Training : 10 years of collaboration

IRA training expertise, experience, recognized courses

Different fields :

- Complementary experience
- Mutual enrichment

Common Projects

Collaboration

- External and internal dosimetry
- Activated material
- Detector development
- Consultancy
- **Trainings**

RP Training : 10 years of collaboration

IRA training expertise, experience, recognized courses

Different fields :

- Complementary experience
- Mutual enrichment

Trainings CERN-IRA

CERN : RP Training awareness

IRA : RP Training

RPE

RSSO

CERN

- 3 online courses - 40 000 trained people*
- 4 classroom courses - 9 000 trained people*

* since 2011

Facilities Access

Modular approach : Blended learning

> **Continuous improvement**

IRA

- Approved and recognized trainings by FOPH
- Swiss legislation revised in 2018
- Specific classroom courses

> Future : Blended learning

Trainings CERN-IRA

CERN : RP Training awareness

IRA : RP Training

RPE

RSSO

Radiation Protection Expert

- RPE [CERN] vs RPO [Europe]
- Goals and objectives defined in the Swiss Legislation
- 2008-2019: 11 sessions, 213 persons trained
(Max 24 p/session)
- 10 days Swiss part and 2.5 days specific CERN part
- Exam : practical + theoretical
- Legal Swiss texts: FR/IT/GER

Radiation Safety Support Officer

- CERN specific role > Part of their main work
- Goals and objectives defined with IRA
- 1 session/year
- 2016-2019 : 3 sessions , 45 persons trained
- 1 day IRA Trainers and 4 days CERN Trainers

Challenges

Large diversity of audience :

Different age, background, studies level, specialization, experience, nationality, risk approach...

Adapted contents and practices

- Trainer adaptability
- Theoretical and practical parts combination/mixed group

→ Safety culture : wide environments and challenges

Different communities but complementary challenges

Synergies

Working Group ARRAD

RP association for french speakers

Members :

- Haute école de santé de Genève (HEdS-GE)
- Haute école de santé de Vaud (HESAV)
- Hôpital neuchatelois
- Hôpital du Valais
- Office fédéral de la santé publique (FOPH)
- CERN
- IRA

3 to 4 sessions per year

<http://arrad.ch/>

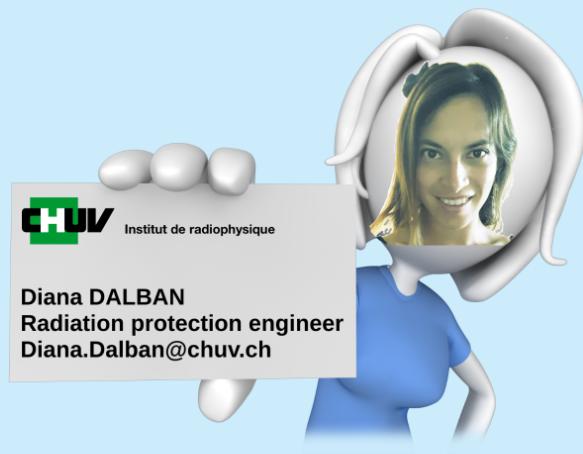

Conclusions

- Strong, enriching and rewarding collaboration
 - Both partners benefit from their respective experience and help to face challenges
 - Share methodologies, practices, expertise
- Creation of RP Training working group

**The whole is greater than the sum of its parts
